

EMC MICROPHONE SHIELDING SOL-BOX

Specifically designed to provide inexpensive speech protection from the threat posed by mobile phones in secure areas and meeting rooms

The range of portable Mobile Protection Boxes provide an effective electronic solution to the problem of having mobile phones in sensitive areas that may be transmitting or recording speech.

Security Advisers recognise that we need our mobile phones to keep in touch, but that these can introduce serious security risks. The devices house a proprietary protection device that inhibits the microphones within the mobile handset, without affecting their ability to receive phone calls, text messages, email

KEY

FEATURES

- Option to house 1-10 handsets
- Internal handset charging
- Portable
- SOL-2 can have in-built UVC disinfectant capability
